Needs In One Easy Step !**

Plug-N-Stub™

The First Nipple Like Test
Plug For Plastic Glue Joint Fittings

Problem....

Tired of struggling with under the sink drain connections? Have you ever gone back on finish to find your closet flange to high or even tiled over? If so help is here!

Solution....

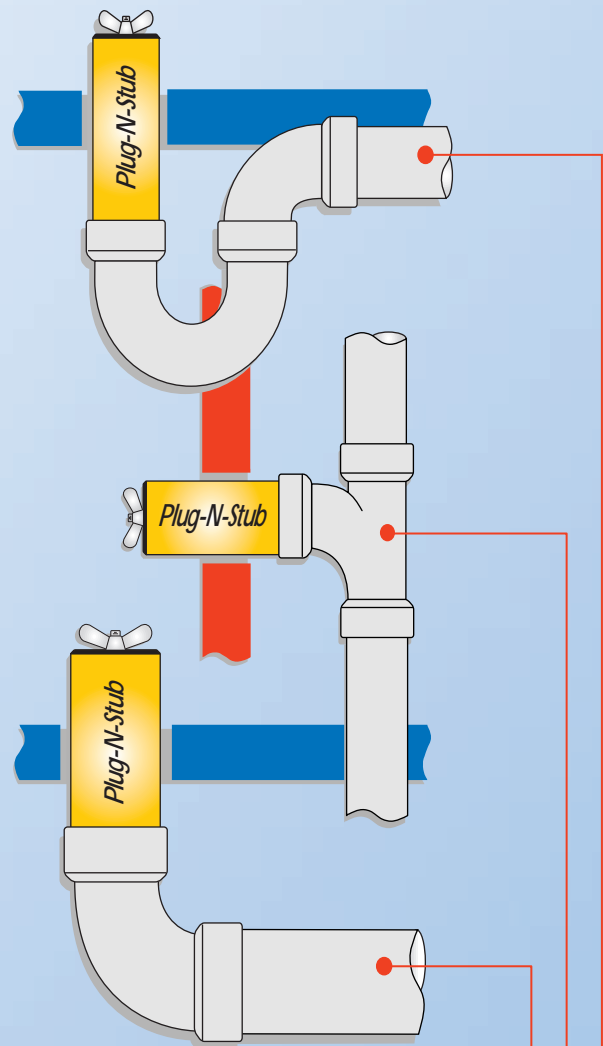

"Plug-N-Stub" the first reusable test plug made specifically for plastic glue joint fittings. Key features include a specially designed "Pinch" ring to help prevent blow-outs during testing. In addition to being removable, the nipple like design provides easy through floor and wall access.

- Exclusive stainless steel "Pinch" ring
- Easy to grip cast steel wing nut
- Protection end cap for when not in use
- Safety yellow for high visibility
- One year parts replacement warranty

Simplicity....

Operation is fully mechanical, just install on rough and remove on finish. Once removed simply pipe out your hub connection as needed.

So say goodbye to guess work and internal pipe cutters. With the all new "Plug-N-Stub" you can now set your flanges, strainers and other drain terminations on finish!

- Through floor shower strainer
- Through wall basin / sink
- Through floor closet flange

Available in 1-1/2", 2" & 3" pipe sizes

SAFETY FIRST!

Always follow directions when using test plugs
