

Jam-Bar

Part No. **53991**

Hold Back For Easy Nut Removal

- Patented “V” Blade Stops Bolt Spin
- Simplifies Toilet & Tank Removal
- Grips Both 1/4” & 5/16” Bolts
- High Quality Tool Steel
- Easy Grip Handle

**US Patent
No. D628,866*

“Micro Teeth”

Form No. CS-JB1414

Stop bolt spin during toilet removal with the one and only “Jam-Bar” lock wrench. Unlike conventional tools the flat blade design easily slips in below the nut and grabs the bolt.

The patented “Micro Tooth” blade locks the bolt in place as you work off the nut. The more the bolt tries to spin, the tighter the grip! Works on both 1/4” & 5/16” bolts.

This innovative tool can also be used in-between the tank and bowl when removing tank bolts. Save time & money and put one in your tool box today!

*Covered by multiple US patents. Other patents pending. Made and packaged in USA
